

FOUNDATION · GRANT APPLICATION

NaijaJobber

Grant Budget Narrative

Justification for a \$250,000 workforce development grant supporting platform build-out, community onboarding, and measurable remote employment outcomes across Africa.

Applicant: NaijaJobber | **Date:** July 2026

Prepared for submission to workforce development, digital economy, and youth employment funders.

1. Project Summary

NaijaJobber requests **\$250,000** over 12 months to accelerate an AI-enabled remote employment platform that connects African job seekers with verified global employers. The project directly supports youth and women entering remote work, improves employer trust through verification and moderation, and produces auditable impact metrics for funder reporting.

GRANT AMOUNT

\$250k

DURATION

12 mo

PRIMARY KPI

25 hires

2. Program Objectives

- 1. Onboard **500+ verified job seeker profiles** with CV, skills, and learning pathways.
- 2. Recruit **50 verified employers** offering remote-friendly roles.
- 3. Publish **100+ quality job listings** with structured application data.
- 4. Document **25 successful placements** with hire confirmation workflow.
- 5. Launch grant-ready **impact dashboard** (users, jobs, countries, demographics).

3. Budget Summary

Category	Amount (USD)	% of total
Product & engineering	\$100,000	40%
Go-to-market & community	\$62,500	25%
Operations & customer support	\$50,000	20%
Legal, compliance & admin	\$25,000	10%
Contingency	\$12,500	5%
Total	\$250,000	100%

4. Line-Item Narrative

4.1 Product & Engineering — \$100,000

Funds sustain core platform development: seeker and employer dashboards, admin/ops tooling, verification workflows, AI-assisted CV tools (mock-safe demo mode), billing integration staging, and impact reporting exports. Includes part-time senior engineering, QA, and cloud infrastructure (MongoDB Atlas, hosting, email, monitoring).

Sub-item	Amount	Justification
Engineering labor	\$72,000	Platform features, security, RBAC, audit logs
Cloud & dev tools	\$18,000	Production-grade hosting, DB, CI, observability
UX / accessibility	\$10,000	Mobile-responsive flows for underserved users

4.2 Go-to-Market & Community — \$62,500

Supports seeker acquisition through university partnerships, referral incentives, learning content, and social campaigns; employer outreach via verification-led trust messaging; and pilot partnerships with workforce NGOs. Marketing spend is tied to measurable signup and verification funnels.

Sub-item	Amount	Justification
Community programs	\$25,000	Workshops, onboarding events, ambassador stipends
Digital marketing	\$22,500	Targeted ads, content, employer case studies
Partnership development	\$15,000	NGO/university MOUs, co-branded pilots

4.3 Operations & Customer Support — \$50,000

Covers moderation (company verification, fraud review), support ticket SLAs, finance ops for subscriptions/refunds, and training for Moderator, Support, Finance, and Marketing ops roles modeled in the platform. Ensures safe marketplace quality for grant beneficiaries.

Sub-item	Amount	Justification
Moderation & verification	\$22,000	Document review, employer vetting queue
Support staff	\$18,000	Seeker/employer helpdesk, onboarding assistance
Ops tooling & training	\$10,000	Playbooks, SLA tracking, staff onboarding

4.4 Legal, Compliance & Admin — \$25,000

Privacy policy and terms, data protection alignment, contractor agreements, grant compliance reporting templates, and general administrative costs (accounting, bank fees, insurance review).

4.5 Contingency — \$12,500

Reserved for exchange-rate fluctuation, unexpected infrastructure scaling, or accelerated verification demand. Drawdown requires written internal approval and funder notification if material.

5. Timeline & Disbursement

Tranche	Amount	Timing	Milestones
Tranche 1	\$125,000	Month 0	MVP ops live; impact baseline established
Tranche 2	\$125,000	Month 6	250 seekers, 25 employers, 50 jobs published

6. Impact Measurement & Reporting

NaijaJobber will report quarterly using platform-native metrics:

- Registered and verified job seekers (with optional gender/youth tags where consented)
- Verified employers and active job posts (remote vs hybrid)
- Applications submitted and interviews scheduled

- Confirmed hires (employer attestation + seeker confirmation)
- Countries and cities reached
- Learning module completions and referral participation

Exports available in CSV/JSON from the admin impact module for funder dashboards. All personal data reporting is aggregated and anonymized per privacy policy.

7. Sustainability Beyond Grant

Employer subscription revenue (Basic/Pro/Enterprise) and featured job fees are projected to cover ~60% of operating costs by month 18. The platform architecture is designed for long-term operation without grant dependency; this funding de-risks launch and establishes marketplace liquidity.

8. Alignment with Funder Priorities

Funder priority	NaijaJobber response
Youth employment	Seeker-first UX, learning, referrals, placement tracking
Digital economy	Remote roles, AI-assisted tools, scalable SaaS platform
Gender inclusion	Impact tags + outreach to women in tech communities
Transparency	Audit logs, verification, exportable impact reports
